

8 Signs of Terrorism

Even though the death of Osama bin Laden might symbolize the end of a reign of terror, citizens must remain vigilant and aware of their surroundings and their community.

A special video seminar, "[8 Signs of Terrorism](#)," has been produced by the Arizona Counter Terrorism Information Center with the assistance of several law enforcement agencies in Arizona. This video can be watched in its entirety or in shorter chapters.

It is an excellent resource and a handy way to remember what to look out for when considering those people who would do us harm.

Remember: If you see something, say something.
